Overview USDX

USDX is an on-chain synthetic stablecoin issued and redeemed by Orbis Labs, with 1 USDX = 1 USD. Anyone (projects or users) can deposit 1:1 “**USDT and BOX**” to mint USDX worth “**120% of the deposit**” (20% fixed yield), released daily at 0.3% until fully released.

Add USDX and USDT liquidity to earn an extra 10%-300% in LP yield.

Redemptions are backed by the Treasury Pool, and the smart-contract Stabilizer ensures USDX can be swapped for USDT.

Core Advantages

Dual-token 1:1 mint, get **120% USDX**

01

Dual-Token Mint Get 120%

Deposit 1:1 USDT and BOX to mint USDX worth 120% — a fixed 20% yield.

02

Daily Release 0.3%

Minted USDX is released at 0.3% per day until fully released.

03

Stabilizer Backed Peg

USDX is issued and redeemed by Orbis; the smart-contract Stabilizer ensures USDX can be swapped for USDT.

04

LP Bonus Yield 10%-300%

Add USDX/USDT liquidity to earn an extra 10%-300% LP yield.

A photograph of Warren Buffett, an elderly man with white hair and glasses, wearing a dark pinstripe suit, a white shirt, and a red patterned tie. He is sitting in a black chair, leaning back with his hands resting on his thighs. The background is a blurred indoor setting with a brick wall and some plants.

Fuel for the BOX Ecosystem

- Strong dual-token buy pressure: minting requires equal-value USDT and BOX, locking in steady, rigid demand for BOX at the source.
- Deflation tightens supply: part of the deposited BOX is burned and part is permanently locked in the LP, so circulating BOX shrinks step by step.
- Siphon effect drives the flywheel: as quality projects mint USDx, large amounts of BOX are locked into the Treasury and underlying pools, creating a “rising demand → shrinking supply → rising value” deflationary flywheel.

Value Growth

USDT+BOX Dual-Token Deposit

Per 1,000U total deposit: 500 USDT + 1,000 BOX (example price 0.5)

Treasury Pool

85% to the Treasury Pool: 425 USDT + 850 BOX as redemption reserve

Liquidity Pool

5% to LP: 25 USDT + 50 BOX, 999-year timelock

Stabilizer

5% of USDT (25 USDT) to the Stabilizer for USDT swaps

Burn

5% of BOX (50 BOX) burned directly

Marketing

5% of USDT (25 USDT) to the marketing fund

To Shares

5% of BOX (50 BOX) injected into Shares

Leo 利欧 bd

Cumulative Release

20% Mint Reward

Deposit 1:1 USDT and BOX to mint USDX worth 120%, equal to a 20% annualized yield.

0.3% Daily Release

Minted USDX is released at 0.3% per day — 3% in 10 days, fully released in about 334 days.

LP Bonus Yield

Add USDX/USDT liquidity: 0.25% LP fee, roughly 10%-300% APR (variable).

Redemption

USDX redeems into USDT + BOX for a 0.5% fee, with a 24-hour window on the 30th of each month. The ratio depends on Treasury Pool value vs. circulating USDX market cap. Everyday swaps use the Stabilizer (0.1%-0.5% fee by queue time) or the liquidity pool.

0.25% LP fee

Direct Swap

A USDX/USDT Uniswap pool lets users swap USDX for USDT directly on-chain

0.5% fee

Full Redemption

Opens for 24h on the 30th monthly; when the Treasury Pool exceeds USDX market cap, redeem 1:1 for USDT + BOX

0.1%-0.5% fee

Stabilizer

Smart contracts ensure USDX can be swapped for USDT, funded by mint inflows, 30% of company revenue and project purchases

0.5% fee

Discounted Redemption

When the Treasury Pool is below USDX market cap, ratio = Treasury value / circulating USDX

Use Cases

USDx has many uses: sell it for USDT, hold it to earn LP (BOX) yield, or use it for payments, spot liquidity pools and derivatives margin. More applications are coming to the DeBox ecosystem.

Payments

Use it for payments across the USDx ecosystem with 5% off via the universal payment API, and for offline shopping

Derivatives Margin

Use USDx as margin to open contracts and trade derivatives

Spot Pools

Projects pair USDx with their own tokens to get a USDx zone, ecosystem support and more

Holder Protection

Pro-Rata Discounted Redemption

Discounted redemptions pay USDT + BOX at “Treasury value / circulating USDX” — whatever the order, every holder gets the same ratio

Early and late redeemers receive the same ratio, so remaining holders are never diluted

0.3% Daily Release

Minted USDX is released at 0.3% per day — 3% in 10 days, 9% in 30 days — until fully released

Team Rewards

Studio Line 0 · Est. 10-15 lines

In Phase 2, the 5% Shares portion and the 5% marketing fund can be bundled into **multi-tier team rewards**, unlocked by “downline volume + own minting”:

Tier	Tier 1	Tier 2	Tier 3	Tier 4	Tier 5	Tier 6	Tier 7	Tier 8	Tier 9	Tier 10	Tier 11	Tier 12
Volume (USD)	1,000	2,000	5,000	10K	20K	50K	100K	500K	1M	2M	5M	10M
Reward	30%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%	5%

Note: 1. Claimable rewards are capped at your own total minting; 2. Rewards are paid in U and BOX.

Leo 利欧 bd

Risk Disclosure

Synthetic, Not 100% Collateralized

85% of each deposit goes to the Treasury Pool; with the 20% mint reward, nominal collateral is below 100%, backed by BOX value and a 999-year LP timelock. If the Treasury falls short, redemptions are paid pro rata.

Revenue Drives Liquidity

30% of company revenue flows to the Stabilizer; users can add USDX/USDT liquidity for LP yield. Pool depth tracks revenue and user base

Rebalancing and Liquidity Costs

Stabilizer swaps cost 0.1%-0.5% depending on queue time, Treasury redemptions cost 0.5%, and redemption opens only 24 hours on the 30th of each month

FAQ

01 What do I get for 1,000 U?

A 1,000 USDT dual-token deposit mints 1,200 USDX, released at 0.3% (3.6 USDX) per day until complete.

02 Will the daily release shrink?

No. It is fixed at 0.3% of the minted total: full daily amounts for 333 days, the remainder on day 334.

03 Can locked USDX be moved?

No. Locked USDX can only be claimed through the fixed daily release; there is no early exit.

04 Can redemption mean a loss?

On the 30th, if the Treasury Pool is below USDX market cap, USDT and BOX are paid at "Treasury value / circulating USDX".

05 What if BOX crashes?

Treasury USDT is unaffected by BOX price; if the Treasury falls short, USDT + BOX are paid pro rata at the same ratio for everyone.

06 Is USDX stable at 1:1?

Everyday swaps to USDT at 1:1 go through the Stabilizer (0.1%-0.5% fee); Treasury redemptions pay at net value when it falls short.

07 How to get BOX for large mints?

Get large amounts of BOX via OTC. OTC is outside the stablecoin protocol; pricing, settlement and delivery happen independently.
Contact: contact@usdx.ltd

08 How to verify the LP timelock?

The LP position is held by the FeeLocker contract with a 999-year timelock: non-upgradeable, with no code path to withdraw principal. Anyone can verify the on-chain bytecode.
